3. HAZARDS IDENTIFICATION

HEALTH HAZARDS: Chronic exposure; prolonged skin contact may cause an allergic reaction with dermatitis.

EYE CONTACT: Exposure can cause severe irritation and burning of the eyes.

SKIN CONTACT: Corrosive. Exposure can cause skin burns.

INGESTION: Corrosive. May produce abdominal pain, nausea, and vomiting.

INHALATION: Exposure may irritate the mucous membranes. May cause lung edema. Symptoms may include sore throat, shortness of breath, inflammation of the nasal passages, coughing, and wheezing. Any exposure may cause an allergic reaction. Asthma-like symptoms and life-threatening shock may result.

4. FIRST AID MEASURES

EYES: Immediately flush with water for at least 15 minutes. Get medical attention.

SKIN: Wash thoroughly with soap and water, flushing for at least 15 minutes. Remove all contaminated clothing and wash or clean prior to reuse. Immediately consult a physician.

INHALATION: Remove to fresh air. If breathing is difficult, administer oxygen. If not breathing, give artificial respiration. Seek immediate medical attention.

INGESTION: Do NOT induce vomiting. Rinse mouth vigorously. Give large quantities of water to drink. Keep person warm and seek medical attention. Never give anything by mouth to an unconscious or convulsing person.

5. FIRE AND EXPLOSION HAZARDS

FLASH POINT: Non-combustible

FLAMMABLE LIMITS: Non-combustible

EXTINGUISHING MEDIA: Use any means suitable for the surrounding fire, do not use water.

SPECIAL FIRE FIGHTING PROCEDURES: Wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full face-piece operated in the pressure demand or other positive pressure mode. Sealed containers may rupture when heated.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Not combustible but substance is a strong oxidizer and its heat of reaction with reducing agents or combustibles may cause ignition. Heating or contact with water releases oxygen, which may intensify combustion, in an existing fire. The substance poses an explosion hazard when mixed with finely powdered organic matter, metal powder, or reducing agents.

6. ACCIDENTAL RELEASE MEASURES

GENERAL PROCEDURES: Wear appropriate personal protective equipment. Spilled material should be collected and put in approved DOT container and isolated for disposal. Isolated material should be monitored for signs of decomposition (fuming/smoking). If spilled material is wet, dissolve with large quantity of water and dispose as a hazardous waste.

ENVIRONMENTAL: Do not allow material to contaminate surface or ground water. Prevent product from entering drains.

7. HANDLING AND STORAGE

HANDLING: Use only in well ventilated areas, unless used with recommended respiratory protection. Use clean plastic or stainless steel scoops only.

STORAGE: Store unopened in a cool, clean, dry place away from point sources of heat, e.g. radiant heaters or steam pipes. Use first in, first out storage system. Avoid contamination of opened product.

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

ENGINEERING CONTROLS: General and/or local exhaust ventilation that airborne concentrations remain below the maximum exposure limits.

PERSONAL PROTECTIVE EQUIPMENT

EYES AND FACE: Wear chemical goggles and/or face shield to avoid splashing on face. Wear head covering which completely protects the head and neck.

SKIN: Wear chemically resistant boots, gloves, and chemical suit (Tychem or equivalent).

RESPIRATORY: If exposure exceeds occupational exposure limits, use an appropriate NIOSH approved full-face piece respirator, half-face piece respirator with splash goggles, or powered, filtered air-supplied hood.

OTHER PROTECTIVE EQUIPMENT: Provide eyewash fountain and quick drench facilities in close proximity to points of potential exposure.

HYGIENE PRACTICES: Wash with soap and water after handling. Remove contaminated clothing and wash before reuse.
